# ESRD Special Project

**Developing Clinical Performance Measures for the Care of Patients with End Stage Renal Disease**

# Phase II:

# 2000 Study of ESRD Clinical Performance Measures: Reliability Report

## Deliverable #23
## Reliability Testing Report on the 2000 CPMs Data Collection

**January 19, 2001**

**Submitted to:**

Mary Beth Ribar
Acute & Chronic Disease
Management Division
QMHAG, OCSQ
Health Care Financing Administration

Baltimore, MD 21244

Nancy Tollison, Project Officer
Health Care Financing Administration
Region X
2201 6th Avenue, MS/RX-42
Seattle, WA 98121

**Submitted by:**

Jonathan Sugarman, MD, MPH, Project Director
Naomi Maxey, Project Coordinator
Lisa Zhao, MS, Data Analyst
PRO-West, A Professional Review Organization
10700 Meridian Avenue North, Suite 100
Seattle, WA 98133

This material was prepared by PRO-West under a contract with the Health Care Financing Administration (HCFA). The contents presented do not necessarily reflect HCFA policy.

PRO-West Document Number 6SOW-WA-ESRD-01-03(PW0224 01/00)

# Table of Contents

## Contents

Introduction ..... 1

Background ..... 1

Project Methods ..... 1

Statistical Methods ..... 1
Agreement Rates ..... 2
Concurrence ..... 2
Kappa Statistics ..... 2

T-Test statistics Based on Means ..... 2

Data Collection ..... 2

Sample and Measures: Hemodialysis CPMs ..... 3

Sample and Measures: Peritoneal dialysis CPMs ..... 3

Sample and Measures: Hemodialysis Facility Forms ..... 4

Results ..... 4

Hemodialysis CPMs ..... 4

Peritoneal Dialysis CPMs ..... 5

Hemodialysis Facility Forms ..... 5

Conclusions ..... 6

## Tables

Table 1: Calculation of data concurrence ..... 7

Table 2: Comparison of categorical data abstracted by dialysis facility staff to categorical data re-abstracted by ESRD Network staff for selected hemodialysis measures (excluding measures related to vascular access) ..... 8

Table 3: Comparison of means for continuous data abstracted by dialysis facility staff to continuous data re-abstracted by ESRD Network staff for selected hemodialysis measures (excluding measures related to vascular access)..... 9

Table 4: Reported Kt/V [Question16I]..... 11

Table 5: Method used to calculate the reported Kt/V [Question 16J] ..... 11

Table 6: Hemoglobin ≥ 9gm/dL [Question 15A] ..... 12

Table 7: Hemoglobin ≥ 11gm/dL [Question 15A]..... 12

Table 8: Transferrin saturation ≥ 20% [Question 15F] ..... 12

Table 9: Serum ferritin concentration ≥ 100 ng/dL [Question 15E]..... 12

Table 10: Epoetin dosage prescription (Y/N) [Question 15B] ..... 13

Table 11: Prescribed route of epoetin administration [Question 15D] ..... 13

Table 12: Serum albumin values (≥ 3.5/3.2 gm/dL by BCG/BCP methods) [Question 17A]..... 14

Table 13: Laboratory method used to measure serum albumin in Table 12 [Question 17B] ..... 14

Table 14: The type of access used on the last hemodialysis session on or between October 1, 1999, and December 31, 1999 [Question 18A] ..... 15

Table 15: Reason for catheter, if used for access between October 1, 1999, and December 31, 1999 [Question 18B1] ..... 16

Table 16: Catheter duration ($90 days), if used for access between October 1, 1999, and December 31, 1999 [Question 18B2] ..... 17

Table 17: Presence of routine monitoring for stenosis, when synthetic grafts, bovine grafts, or AV fistulas were used for access between October 1, 1999, and December 31, 1999 [Question 18C1] ..... 17

Table 17a-e: The routine stenosis monitoring method used between October 1, 1999, and December 31, 1999, when synthetic grafts, bovine grafts, or AV fistulas were used for access [Question 18C2] .....18-20

Table 18: The type of access used at the initiation (re-initiation) of the first time hemodialysis, if between January 1, 1999 – August 31, 1999 [Question 19A] ..... 20

Table 19: The type of access used 90 days after the date in Table 18 during the initiation (re-initiation) of hemodialysis, if between January 1, 1999 – August 31, 1999 [Question 19C] ..... 21

Table 20: Limb amputation (Y/N) [Question 13]..... 21

Table 21: Number of scheduled hemodialysis times per week [Question 16A]..... 22

Table 22: Agreement rate of data abstracted by dialysis facility staff to data re-abstracted by ESRD Network staff for selected hemodialysis measures..... 22

Table 23: Comparison of categorical data abstracted by dialysis facility staff to categorical data re-abstracted by ESRD Network staff for selected peritoneal dialysis measures..... 23

Table 24: Comparison of means for continuous data abstracted by dialysis facility staff to continuous data re-abstracted by ESRD Network staff for selected peritoneal dialysis measures..... 24

Table 25: Reported Kt/V [Question 18D] ..... 25

Table 26: Method used to calculate the V in $Kt/V_{urea}$ [Question 18E]..... 25

Table 27: Reported weekly creatinine clearance [Question 18F]..... 26

Table 28: Creatinine clearance corrected for body surface area, using standard methods (Y/N) [Question 18G] ..... 26

Table 29: Hemoglobin ≥ 9 gm/dL [Question 15A]..... 26

Table 30: Hemoglobin ≥ 11 gm/dL [Question 15A]..... 26

Table 31: Transferrin saturation ≥ 20% [Question 15F]..... 27

Table 32: Serum ferritin concentration ≥ 100 g/mL [Question 15E]..... 27

Table 33: Epoetin dose prescription (Y/N) [Question 15B]..... 27

Table 34: Prescribed route of epoetin administration [Question 15D] ..... 27

Table 35: Serum albumin values (≥ 3.5/3.2 gm/dL by BCG/BCP methods) [Question 16A]..... 28

Table 36: Laboratory method used to measure serum albumin in Table 35 [Question 16B] ..... 28

Table 37: Number of scheduled dialysis days per week [Question 19A] ..... 28

Table 38: Total number of exchanges per 24 hours for CAPD patients [Question 19B2] ..... 29

Table 39: Total number of dialysis exchanges during the nighttime for cycler patients [Question 19C3b] ..... 29

Table 40: Total number of dialysis exchanges during the daytime for cycler patients [Question 19C4b] ..... 30

Table 41: Prescription changed (Y/N) [Question 19E2] ..... 30

Table 42: Limb amputation (Y/N) [Question 13] ..... 31

Table 43: Agreement rate of data abstracted by dialysis facility staff to data re-abstracted by ESRD Network staff for selected peritoneal dialysis measures ..... 31

Table 44: Do facilities have a written policy for the timing of the post-BUN sample collection? [Question 1] ..... 32

Table 45: Facilities' written policy regarding post-dialysis BUN sampling [Question 1] ..... 33

Table 46: Facilities' compliance with written policy (internal audit) regarding post-dialysis BUN sampling [Question 2] ..... 34

Table 47: Facilities that re-used dialyzers from October 1, 1998, to December 31, 1998 [Question 3] ..... 34

Table 48: Facilities that pre-volumed 95-100% of dialyzers intended for reuse [Question 3] ..... 35

Table 49: Facilities that pre-volumed <95% of dialyzers intended for reuse [Question 3] ..... 35

Table 50: Facilities that used batch testing and/or of an average TCV for a group of hemodialyzers to infer TCV [Question 3] ..... 36

Table 51: Facilities that used the manufacturer's product information to infer TCV [Question 3] ..... 36
